

This trick play folder includes all clips in an individual folder for easy upload to Hudl. I have collected these clips from various resources over the past 10 years and am sharing them here. You can drop the folder into Hudl to get all data and then you can add the CSV file in the folder into Hudl as well to get the data for them to see what type of play each one is. The data column in Hudl that has the play data in it is the NOTES column.

You will have to request access to get all of the plays. I will add you after you request access.

[Click Here and Request Access to the folder.](#)
